Global Employee Handbook

Document Version: 2026.V1

Effective Date: January 1, 2026

Published By: Department of Human Resources

Target Audience: All Global Full-Time & Part-Time Staff

Welcome Message & Corporate Philosophy

Dear Colleague, Welcome to Innovation Technology Co., Ltd. We are delighted that you have chosen to bring your talents, ambitions, and unique perspectives to our team. Every breakthrough we achieve is built upon the collective intelligence and dedication of individuals like you.

| 1.1 Our Corporate Vision

Our vision is to become the world's most trusted and versatile technology solutions infrastructure provider. We solve highly complex physical and digital infrastructure problems through advanced automation, cloud architecture, and artificial intelligence, empowering global businesses to scale sustainably into the next generation.

| 1.2 Core Values & Ethical Pillars

We operate strictly on four foundational pillars that guide our internal product development and external client relations:

- **Innovation with Purpose:** We do not innovate for the sake of novelty. Every piece of code written and every hardware module designed must address a real-world friction point.
- **Uncompromising Integrity:** Transparency defines our operational framework. We communicate vulnerabilities honestly to our peers and clients, prioritizing safety and compliance above immediate commercial gains.
- **Radical Collaboration:** Silos are the enemies of progress. Our engineering, product, marketing, and HR units work as highly cohesive, overlapping networks.
- **Excellence in Execution:** We believe that details matter. From clean code syntax to seamless customer support interactions, we hold ourselves to international professional benchmarks.

| 1.3 Working Environment and Open Communication

We foster an agile, open-door atmosphere where hierarchy serves as structural support rather than an impediment to creative dialogue. We actively encourage smart risk-taking and firmly believe that constructive failures provide invaluable architectural data for future successful deployments.

Operational Policies & Code of Conduct

| 2.1 Workplace Professionalism

Employees are expected to maintain an environment free of harassment, bias, and political friction. Professional courtesy must be extended to all team members, external contractors, and international partners regardless of their role, background, or geographic location.

| 2.2 Data Privacy, Security & IP Protection

As a deep-tech infrastructure corporation, information asset security is our paramount operational priority. All devices used for official business must comply with strict corporate MDM (Mobile Device Management) security baselines:

- Multi-Factor Authentication (MFA) is strictly mandatory across all internal portals, source-code repositories, and communication clients.
- Intellectual Property (IP): Any software framework, database architecture, design asset, or patentable concept generated during your employment automatically constitutes the exclusive property of Innovation Technology Co., Ltd.
- Non-Disclosure Obligations: Internal architectural diagrams, strategic roadmaps, and client lists are strictly confidential and must never be shared on public repositories or personal messaging applications.

| 2.3 Flexible Working Hours & Core Collaboration Time

We understand the importance of asynchronous workflows in modern engineering. While our standard office hours span from Monday to Friday, 9:00 AM to 6:00 PM, we support a hybrid structure. Our global core collaboration window is defined between 10:00 AM and 4:00 PM local time, during which employees must be accessible for active team synchronization and customer-facing escalations.

| 2.4 Digital Attendance and Time-Tracking Systems

To remain compliant with regional labor standards and optimize resource allocations, all employees must log their operational status or field-work exceptions via the internal Enterprise Portal App. Deliberate misrepresentation of working times is considered an explicit breach of our professional trust model.

Compensation, Advancement & Training

3.1 Salary Architecture & Performance Cycles

Fixed salaries are transferred to employees' designated banking structures on the 10th calendar day of each consecutive month. If the 10th falls on a Saturday, Sunday, or public holiday, the transfer is automatically accelerated to the immediately preceding business day. Annual performance reviews occur during Q4 of each fiscal year, directly impacting merit-based salary adjustments and variable project bonuses.

3.2 Promotion Framework & Career Paths

We map career advancements across parallel tracking systems to accommodate different personal goals: the Individual Contributor (IC) track for deep technical specialists and the Management (M) track for personnel leadership. Promotions are evaluated based on demonstrable historical business outcomes, technical competence, and peers' 360-degree feedback cycles.

3.3 Comprehensive Health, Wellness & Social Benefits

The company provides a robust supplementary welfare package designed to protect you and your dependents:

- **Six Insurances & Top-Tier Housing Fund:** Maximum statutory contribution rates are consistently maintained across all regional entities to ensure substantial long-term stability.
- **Annual Premium Medical Screening:** Access to comprehensive corporate-sponsored health evaluations at designated tier-one private medical institutions.
- **Wellness Stipends:** Monthly recurring allowances to offset costs linked to gym subscriptions, continuous ergonomic equipment upgrades, and mental health counseling.

3.4 Continuous Education & Learning Allocations

Innovation demands continuous learning. Every full-time staff member is granted an annual self-directed educational budget to acquire professional technical certifications, attend global research summits, or purchase advanced educational materials related to their domain of work.

Leave Policies & Statutory Compliance

4.1 Paid Annual Leave Entitlements

Upon completing twelve months of continuous service, full-time personnel are immediately entitled to 5 days of fully paid annual leave. This base increment scales linearly by 1 additional day for each complete consecutive year of tenure with the organization, capped at a comprehensive threshold of 15 days per annum.

4.2 Statutory, Sick, and Compassionate Leave

All national and regional public holidays are strictly honored. Paid sick leave requires the submission of a valid certificate from an accredited medical practitioner within 48 hours of returning to active duties. Compassionate leave is fully supported to ensure employees can prioritize family obligations during critical unexpected life events.

4.3 Conflict of Interest & Secondary Employment

Employees must avoid any financial, professional, or advisory engagement that conflicts directly or indirectly with their core obligations at Innovation Technology Co., Ltd. Side-employment, freelance consulting contracts, or board memberships with competing technology providers without express written authorization from the executive legal counsel is strictly prohibited.

Strict Legal Disclaimer: This document represents a master operational framework and does not supersede local statutory labor contracts. The Human Resources Department retains the exclusive right to modify, add, or deprecate clauses within this handbook to align with evolving international legislative frameworks and global business needs.

4.4 Separation and Offboarding Procedures

Upon formal separation initiated by either party, a standard transition window will apply in strict alignment with regional labor contract terms. Employees must return all physical company assets, including high-security cryptographic keys, test devices, laptops, and documentation, prior to the final clearance day. All access privileges to internal cloud networks will terminate automatically at 6:00 PM on the official final day of employment.
